

Procedure for upgrading dongle

You will receive the program for upgrading the dongle from our Support department. Unzip the file and copy all files *FieldUpgrade.exe*, *DSafe32.DLL* and *USafe32.DLL* into a temporary folder.

Step 1

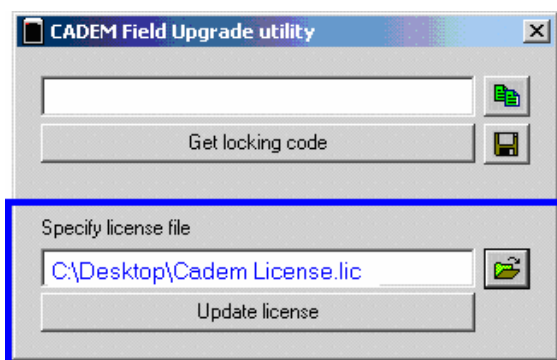

Generate the locking code of the dongle

1. Insert the dongle in the PC's parallel or USB port depending on the type of dongle.
2. Run the program *Fieldupgrade.exe*.
3. Click on the button *Get locking code* from the TOP window.
4. The locking code keeps changing every time you press the button *Get locking code*
5. COPY or SAVE the locking code and email it to Cadem.
6. When we receive the locking code, we will email a license file back to you.

Step 2

Upgrade the dongle

1. Insert the dongle on PC's parallel or USB port depending on the type of dongle.
2. Run the program *Fieldupgrade.exe*
3. Browse to the license file and click on the button *Upgrade license*
4. If the upgrade was successful, you will see the message "Hardware lock upgraded".
